## JANEX SUPERIOR FLOOR PAD TECHNOLOGY MAKES YOUR JOB EASIER, FASTER, AND MORE ECONOMICAL

Advanced, industry-leading technology, strict, uncompromising standards, and exceptionally high quality . . . all are hallmarks of Janex Floor Pads.

The complex science behind each Janex polyester, nylon, and natural hog hair pad is dedicated to saving you time and money on floor maintenance. Janex takes your work to a higher level of performance with:

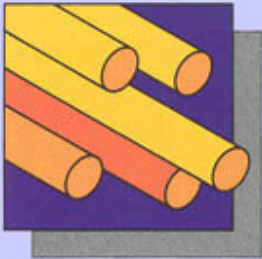

### OPEN WEAVE CONSTRUCTION

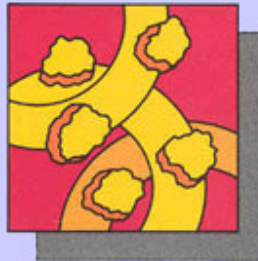

Janex special design greatly increases dirt and film absorption, while dramatically decreasing the number of passes required over the floor; exceptionally easy to clean.

### HEAVY-DENIER FIBERS

Janex large-diameter, extra-tough fibers produce pads that are far stronger, maintain their shape much longer, and work harder.

### EXTRA-LARGE ABRASIVE PARTICLES

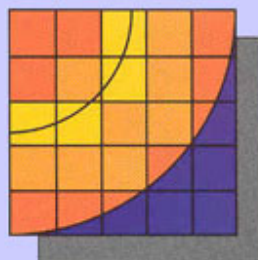

Superior construction allows for the use of bigger particles for more aggressive, more rapid action.

### UNIQUE BONDING SYSTEM

Our special bonding system significantly enhances strength and durability, offers superior water resistance (no water-logged pads) and speeds up drying time.

### METICULOUS AERODYNAMICS

Each pad's webbing is formed according to carefully-measured aerodynamics to assure unrivaled product uniformity and consistency.

**JANEX HAS YOUR FLOOR MAINTENANCE NEEDS COVERED**

## JANEX NYLON FLOOR PADS

Our nylon pads are available in sizes from 8" through 32" and are packed five (5) pads per case.

Each grade is color coded according to abrasiveness and function.

**Black Stripping (M32):** For heavy stripping. Removes floor finish build-up without damage to the flooring.

**Black Strip Xtra (M04):** A firmer, more aggressive stripping pad for quick floor finish removal.

**Green Scrubbing (M30):** For heavy duty scrubbing, or light stripping. Removes the soiled top layer of floor finish.

**Tan Buffing (M31):** For buffing or light scrubbing. Removes scuff marks and soil while producing a smooth finish.

## JANEX POLYESTER FLOOR PADS

Our polyester pads are available in sizes from 8" through 32" and are packed five (5) pads per case.

Each grade is color coded according to abrasiveness and function.

**Black High Performance Stripping (M29):** For rapid heavy duty stripping. Removes floor finish build-up quickly.

**Brown Stripping (M36):** For heavy duty stripping. Removes floor finish build-up without damage to flooring.

**Blue Scrubbing (M35):** For heavy duty scrubbing, or light stripping. Removes the soiled top layer of floor finish.

**Red Buffing (M34):** For spray buffing or light scrubbing. Removes scuff marks and soil while producing a smooth finish.

**White Polishing (M33):** For polishing. An extra fine pad that produces a high luster finish.

## JANEX HIGH-SPEED PADS

Our high-speed pads are available in sizes from 16" through 32" and are packed five (5) pads per case.

Each grade is color coded according to abrasiveness and function.

**Aqua (M46):** For buffing (350-1200RPM), dry or with a mist of spray buff finish. A soft pad that lightly polishes the floor for a reflective appearance.

**Grey Natural Burnishing (M43):** For ultra high-speed burnishing (2000+ RPM). Utilizes natural hog hair to produce a brilliant "wet-look" gloss.

**Ivory (M44):** For high-speed buffing (2000+ RPM). Produces outstanding gloss while withstanding the speed, heat and stress of ultra high-speed buffing.

**Natural Light (M56):** A burnishing pad (1500-3000 RPM) that produces a "high" shine and hard finish. Contains natural hair and synthetic fibers for strength and lubrication.

**UHS Blue (M57):** A high technology burnishing pad (1500-3000 RPM) for soft finishes, that will produce a "wet-look" gloss.

## JANEX ACCESSORIES

In addition to our complete line of natural fiber and synthetic fiber floor pads, Janex offers a wide range of related cleaning products.
