JANEX HIGH SPEED AND ULTRA HIGH SPEED PADS

The spray buff burnish process of floor care over the past 20 years has evolved from a single combination of a conventional (175 RPM) machine with 90-100 lbs. pad pressure and basic finish to the more complex process today called ultra high speed. With the advent of propane, battery and electric machines with varying RPM capability of 1100 to 3000+ RPM burnishing, it has become very difficult to choose the right aggressiveness in the floor pad to achieve the brilliant shiny floor on a consistent basis. **It has been determined that no one pad will achieve the desired result.** Janex has met the challenge by developing a family of floor pads that will transform that energy generated by the various ultra high speed machines, respond to the finish and create the wet look shine. Meet the Janex family of Ultra High Speed Floor Pads.

ULTRA HIGH SPEED JANEX FAMILY PAD CHARACTERISTICS

PAD	DESCRIPTION
RPM ULTRA IVORY	A rubberized binder medium denier fibre burnishing pad. This soft rubberized pad "grabs" the floor and move the finish to a high gloss.
NATURAL LIGHT	Rubberized binders with a blend of natural hair and synthetic fibres create a unique textured burnishing pad. It contains the strength of a synthetic pad with the lubricating effect of a hair pad. Excellent washability with anti-dusting characteristic.
NATURAL GRAY	This new natural hair pad has all the characteristics associated with a traditional hair burnishing pad, including the ability to lubricate and level the finish quickly. The binder is hard and aggressive.
AQUA HIGH SPEED	A superior soft pad that lightly polishes the floor for a reflective appearance.
UHS BLUE	A technology advanced soft pad when teamed up with a soft finish produces a high gloss on the floor.

SUGGESTED USAGE

MACHINE SPEEDS & FINISHES	RPM ULTRA IVORY	NATURAL LIGHT	AQUA	NATURAL GRAY	UHS BLUE
Propane 2000 - 3000 RPM					
Soft buffable finish					●
Medium durable finish	●	●		●	●
Hard highly durable finish	●	●		●	

Battery 1500 - 2000 RPM					
Soft buffable finish	●				●
Medium durable finish	●	●		●	●
Hard highly durable finish	●	●		●	

Electric 1500+ RPM					
Soft buffable finish	●		●		●
Medium durable finish	●	●	●	●	●
Hard highly durable finish	●	●		●	

Electric 1000 RPM					
Soft buffable finish	●		●		●
Medium durable finish	●	●	●	●	●
Hard highly durable finish	●	●		●	

We realize that items and definitions may be different from manufacturer to manufacturer, however, we have used the above information to help determine pad compatibility with the various floor machines and finishes on the market.
